Warsaw Lectures in Personality and Social Psychology
Volume 1
PERSONALITY FROM BIOLOGICAL, COGNITIVE, AND SOCIAL PERSPECTIVES
edited by
Tomasz Maruszewski, Polish Academy of Sciences and Warsaw
School of Social Sciences and Humanities, Warsaw, Poland
Małgorzata Fajkowska, Warsaw School of Social Sciences and
Humanities and Polish Academy of Sciences, Warsaw, Poland
Michael W. Eysenck, Roehampton University, Whitelands
College, London, United Kingdom

“It is my firm conviction that this volume ... is a stimulating book that
represents an important contribution to the field. Therefore it gives me
great pleasure to recommend this volume to fellow researchers,
teachers, and students as an advanced text in courses on personality
and social psychology.”

From the Foreword by
Andrzej Eliasz, Rector
Warsaw School of Social Sciences and Humanities

The diversity of approaches to personality research makes the integration of the
latest findings a challenging goal. In the first volume of the series, the editors and
contributors offer their view of the field of personality as an integrative discipline.
They propose that personality may be studied either in terms of distinctive
characteristic behavior patterns or psychological processes—but analyzed within
an integrated and unifying framework.

Initial chapters address general issues, especially the relationship between biologi-
cal and personality variables. Subsequent chapters cover traits of personality and
behavior on a variety of levels, including the processes of attention and memory,
processes of inferences, and complex social behavior. The book presents theoretical
and empirical evidence on neural reactivity and its relation to individual differences
in personality, and explores the connection between the biological mechanisms of
personality with cognitive, affective, and social systems of individual functioning.

CONTENTS

Introduction: An Integrative View of Personality
Tomasz Maruszewski, Małgorzata Fajkowska, and
Michael W. Eysenck

PART I. ON SOME BIOLOGICAL CONTRIBUTIONS
TO PERSONALITY
1 Is Neurobiology of Personality Inevitable? A Philo-
sosophical Perspective / Katarzyna Paprzycka
2 How Far Are We in Searching for the Biological
Background of Personality? / Jan Strelau
3 A Neurocognitive Model of the Self
Marek Cielecki
4 Perceptual Identity and Personal Self: Neurobiological Reflections / Ernst Pöppel

PART II. NOURISHMENT OF PERSONALITY:
INFORMATION AND EXTERNAL CONDITIONS
5 Time and Cognition from the Aging Brain
Perspective: Individual Differences
Elzbieta Szelag, Joanna Dreszer, Monika
Lewandowska, Justyna Medygral,
Grzegorz Osinski, and Aneta Szymaszek
6 The Mismatch Negativity: A Unique Window on
Central Auditory Processing / Risto Näätänen

PART III. SOCIAL CONTEXT: FROM WITHIN
PERSONS TO AMONG PERSONS
7 Environmental and Genetic Determinants of
Sociopolitical Attitudes / Urszula Jakubowska
and Włodzimierz Oniszczenko
8 The Cognitive Nature of Prejudiced Persons
Kinga Piber-Dabrowska, Grzegorz Sedek, and
Mirosław Kofta
9 ERP Time Course and Brain Areas of Sponta-
neous and Intentional Social Inferences
Frank Van Overwalle and Kris Baetens
